

Authorship criteria is based on the International Committee of Medical Journal Editors (ICMJE) [Uniform Requirements for Manuscripts Submitted to Biomedical Journals](#).

The ICMJE lists four conditions for authorship credit. Authors must meet **all four conditions** in order to be listed.

- Substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data, and
- Drafting the article or revising it critically for important intellectual content, and
- Final approval of the version to be published, and
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

The order of authorship in the byline should be a joint decision of the co-authors. Each author should participate sufficiently in the work to take public responsibility for his or her contributions to the study, the content and for any conflict of interests.

Authorship is not justified for individuals who simply obtain or provide funding, participate in data collection or general supervision of the research, or serve as head of the group, though such contributors may be acknowledged with their written permission in the Acknowledgements section.

Please indicate each author's contribution(s) to the manuscript, using the numbered list below:

1. Research concept and design
2. Collection and/or assembly of data
3. Data analysis and interpretation
4. Writing the article
5. Critical revision of the article
6. Final approval of article
7. Other (please specify)

Name and Surname of Author	Affiliation	Contribution(s) (using the numbered list above)

The corresponding author must submit this form on behalf of all the authors

Disclosure of Interest and Ethical Standards Form

Disclosure of Interest

Authors must provide details of any financial or personal relationships that might bias the work being submitted. In a section of text preceding the References and also in the table below, please provide relevant information for each author. For example: Author A has received speaker honoraria and a research grant from device company X. Author B serves on an advisory board and owns stock in drug company Y. Author C owns the company whose employees served as study therapists. Authors D, E, and F declare that they have no conflicts to report.

Author	Description of Interest/Arrangement

Ethical Standards and Informed Consent

For studies involving human subjects, please indicate in the manuscript, in a section preceding the References, the following statement or an analogous statement that applies to your situation: "All procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2000. Informed consent was obtained from all patients for being included in the study." If any identifying information about participants is included in the article, the following sentence should also be included: "Additional informed consent was obtained from all individuals for whom identifying information is included in this article." If you have not included or cannot include this statement in your manuscript, please provide the reason or an alternative statement here and in the manuscript:

Informed Consent Statement:

Animal Studies

For studies with animals, include the following sentence in the manuscript in a section of text preceding the References: "All institutional and national guidelines for the care and use of laboratory animals were followed." If the authors did not carry out animal or human studies as part of their article they must include the following statement in the manuscript in a section of text preceding the References: "No animal or human studies were carried out by the authors." If you have not included or cannot include one of these statements in your manuscript, please provide the reason or an alternative statement here and in the manuscript.
